For use as hormone therapy in children, adolescents, and adults with gender dysphoria when there is documentation of persistent, well-documented gender dysphoria diagnosed in accordance with criteria established in the Diagnostic and Statistical Manual of Mental Disorders, fifth edition (DSM-5)

Policy Issued By: Amida Care
Policy Title: Clinical Guidelines and Coverage Criteria for the Treatment of Gender Dysphoria
Youth Services:

Hormone therapy, whether or not in preparation for gender reassignment surgery, shall be covered as follows:

- Testosterone requires prior authorization for members with gender dysphoria diagnosis.
- The following do not require a prior authorization:
  - treatment with gonadotropin-releasing hormone agents (pubertal suppressants), based upon a determination by a qualified medical professional that a member is eligible and ready for such treatment, i.e., that the member:
    - meets the criteria for a diagnosis of gender dysphoria
    - has experienced puberty to at least Tanner stage 2, and pubertal changes have resulted in an increase in gender dysphoria does not suffer from psychiatric comorbidity that interferes with the diagnostic work-up or treatment; has adequate psychological and social support during treatment demonstrates knowledge and understanding of the expected outcomes of treatment with pubertal suppressants and cross-sex hormones, as well as the medical and social risks and benefits of sex reassignment treatment with cross-sex hormones for members who are sixteen years of age and older, based upon a determination of medical necessity made by a qualified medical professional; members who are under sixteen years of age who meet treatment criteria shall be covered in specific cases if medical necessity is demonstrated and prior approval is received. [18 NYCRR 505.2_Section 505.2 - Physicians’ services]
For members under eighteen (18) years of age coverage be made in specific cases if medical necessity is demonstrated and prior approval is received.

Policy Issued By: Fallon Health

Policy Title: Gender Affirmation Services

Youth Services:

Puberty Suppression Hormone Therapy:

Adolescents with gender non-conformity or diagnosed gender dysphoria often begin hormone therapy at the onset of puberty. Given puberty suppression is reversible it allows an adolescent the ability to fully explore their gender non-conformity and make informed decisions regarding future treatment. Puberty Suppression hormone treatments are overseen by a Pediatric Endocrinologist and often a Mental Health professional.

In accordance with WPATH the below minimal criteria must be met:

1. The adolescent has demonstrated a long-lasting and intense pattern of gender nonconformity or gender dysphoria (whether suppressed or expressed);
2. Gender dysphoria emerged or worsened with the onset of puberty;
3. Any coexisting psychological, medical, or social problems that could interfere with treatment (e.g., that may compromise treatment adherence) have been addressed, such that the adolescent's situation and functioning are stable enough to start treatment;
4. The adolescent has given informed consent and, particularly when the adolescent has not reached the age of medical consent, the parents or other caretakers or guardians have consented to the treatment and are involved in supporting the adolescent throughout the treatment process.

Policy Title: Gender Affirmation Services /Gender Dysphoria

Youth Services:

Hormone therapy for individuals under the age of 18:

- For those without a medical contraindication to hormonal therapy, authorization of 12 months of hormone therapy is considered medically necessary for young adolescents with a diagnosis of gender dysphoria who are prescribed hormone therapy when ALL of the following criteria are met:
  - Hormone therapy is prescribed for pubertal suppression for the treatment of gender dysphoria; and
  - The individual has reached at least Tanner stage 2 of puberty.

Authorization of for continuation therapy must meet ALL initial authorization criteria.

Refer to CVS Caremark Specialty Guideline Management: Lupron Depot-PED and WPATH criteria Section VI.

Policy Title: Gender Affirmation Surgeries
Youth Services:

C. Member Age:

The member is age 18 or older* on the date of service

* Note: Plan Medical Director review is required for ANY gender affirmation surgery requested for a member less than age 18 on the date of service. Requests for surgical treatment will be reviewed based on the Plan's Medically Necessary medical policy, policy number OCA 3.14, and the current version of the WPATH Standards of Care for Health and Transsexual, Transgender, and Gender-Nonconforming People. In addition, the Plan Medical Director will review the member’s clinical situation, including but not limited to the amount of time the adolescent member has been living in the desired gender role, treatment timeframe with hormone therapy, age of the member, and the requested intervention. Adolescent members may be eligible for interventions when adolescents and their parents (or guardian) make informed decisions about treatment, and the service is a covered benefit for the Plan member. Informed consent by a parent or guardian for treatment of an adolescent member may not apply if the adolescent member is emancipated at the time the service is rendered (as determined by state requirements).

Policy Title: Gender Affirming Services (Transgender Services)
Youth Services:

Puberty Blockers

Gonadotropin-releasing hormone (GnRH) analog treatment for gender non-conforming adolescents seeking to delay puberty is covered at the discretion of the treating provider*. GnRH analogs may be used to either allow patients more time for decision making purposes or as an initial step prior to further gender affirming services such as hormone replacement.

Treatment options include but are not limited to:

- Lupron
- Supprelin LA
- Vantas
- Triptodur (triptorelin).
Surgical Services for Adolescents

Members < 18 years of age will be considered on a case-by-case basis.

In addition to meeting all of the above criteria, providers requesting surgery for members < 18 will need to provide documentation supporting all of the following:

- The member has been evaluated for safety.
- The member has adequate home support.
- The member has realistic expectations regarding the possibilities and limitations of surgery and a full understanding of the long-term consequences of surgical procedures.
- The member has been assessed for any co-existing mental health concerns and is not requesting surgery as an initial response to gender dysphoric puberty.

Policy Issued By: Blue Cross Blue Shield of Vermont
Policy Title: Gender Affirming Services (Trans Services)

Youth Services:

Initiation of feminizing/masculinizing hormone therapy, preferably for members under the age of 18 with parental or legal guardian consent, may be provided after a psychosocial assessment has been conducted and informed consent has been obtained by a health professional.

Exception to the age 18 criteria

Chest surgery in female to male individuals could be considered medically after one year of living in the desired gender role and one year of testosterone treatment. The intent of this sequence is to give adolescents sufficient opportunity to experience and socially adjust in a more masculine gender role, before undergoing irreversible surgery.

Additionally, for those under 18 years of age, the following must be submitted as evidence of puberty completion.*

* Evidence of puberty completion:

a) Documented tanner stage IV or V for members aged 15-18, and
b) Stable height measurements for 6 months, or
c) Puberty completion as shown on wrist radiograph

Policy Issued By: Anthem Blue Cross (California)
Policy Title: Gender Affirming Surgery

Youth Services:

A provider with experience treating adolescents with gender dysphoria may request further consideration of a gender affirming chest procedure case in an individual under 18 years old when they meet all other gender affirming chest procedure criteria above (including prior mental health evaluation) by contacting a Medical Director. Policy Title: Gender Affirming Surgery

Youth Services:

Further Considerations:

A provider with experience treating adolescents with gender dysphoria may request further consideration of a gender affirming chest procedure case in an individual under 18 years old when they meet all other gender affirming chest procedure criteria above (including prior mental health evaluation) by contacting a Medical Director. (Further information is available in the Discussion/General Information section of this document titled ‘Gender Affirming Surgery in Individuals Under the Age of 18’).

Gender Affirming Chest Surgery in Individuals Under the Age of 18 (Return to Clinical Indications)

Further consideration of a gender affirming chest procedure in select individuals under 18 years of age may be appropriate; there may exist extenuating circumstances, such as the level of maturity of the individual, duration of dysphoric symptoms, medical and mental health, and other factors, that should be considered in consultation with a provider with experience treating adolescents with gender dysphoria. The WPATH SOC provides the following guidance for individuals under the age of 18:

Genital surgery should not be carried out until (i) patients reach the legal age of majority to give consent for medical procedures in a given country, and (ii) patients have lived continuously for at least 12 months in the gender role that is congruent with their gender
identity. The age threshold should be seen as a minimum criterion and not an indication in
and of itself for active intervention.

Chest surgery in FtM patients could be carried out earlier, preferably after ample time of living
in the desired gender role and after one year of testosterone treatment. The intent of this
suggested sequence is to give adolescents sufficient opportunity to experience and socially
adjust in a more masculine gender role, before undergoing irreversible surgery. However,
different approaches may be more suitable, depending on an adolescent’s specific clinical
situation and goals for gender identity expression.

Policy Title: Gender Confirmation Surgery and Hormone Therapy

Youth Services:

Criteria for Adolescents Entering Puberty Adolescents, having reached puberty (Tanner 2), and who have met eligibility and readiness criteria can be treated with GnRH analogues. The
The definition of puberty is having reached Tanner stage 2/5 and/or having LH, estradiol levels or testosterone levels, within the pubertal range. These LH, estradiol and testosterone ranges are well-known and published and are broken down by biological male vs. biological female Tanner stage, and nocturnal and diurnal levels. Adolescents are eligible for GnRH treatment, (for suppression of puberty) by these criteria: (same for adults)

1. Have an established diagnosis for GD based on DSM V or ICD-10 criteria;

2. Have experienced puberty to at least Tanner stage 2, which can be confirmed by pubertal levels of LH, estrogen or testosterone; 3. Have experienced pubertal changes that resulted in an increase of their gender dysphoria;

4. Do not suffer from psychiatric comorbidity (that interferes with the diagnostic work-up or treatment);

5. Have adequate psychological and social support during treatment, to include having parental/guardian consent;

6. Demonstrate knowledge and understanding of the expected outcomes of GnRH analogue treatment, cross-sex hormone treatment, and gender affirmation surgeries, as well as the medical and social risks and benefits of gender affirmation; and have been counseled regarding fertility options.

Policy Issued By: Moda Health Plan
Policy Title: Gender Confirming Surgery

Youth Services:

Reversible therapy with puberty-suppressing hormones are medically appropriate with ALL of the following:

1. The adolescent has demonstrated a long-lasting and intense pattern of gender nonconformity or gender dysphoria (whether suppressed or expressed)

2. Gender dysphoria emerged or worsened with the onset of puberty

3. The member has experienced the onset of puberty to at least Tanner Stage 2.

4. Any coexisting psychological, medical, or social problems that could interfere with treatment (e.g. may compromise adherence with treatment) have been addressed such that the adolescent’s situation and functioning are stable enough to start treatment

5. The adolescent has given informed consent, and particularly when the adolescent has not reached the age of medical consent, the parents or other caretakers or guardians have consented to the treatment and are involved in supporting the adolescent throughout the treatment process.

Chest surgery in FtM adolescent patients may be carried out prior to 18 with ALL of the following:

1. Meets all of the criteria for treatment of adolescent with puberty-suppressing hormones and masculinizing hormones

2. Reached the age of medical consent

3. Had ample time (preferably one year) living in the desired gender role

Policy Issued By: AmeriHealth Caritas of Louisiana

Subcutaneous mastectomy, creation of a male chest for transmasculine individuals; including
nipple reconstruction (if appropriate) is covered (subject to Limitations and Administrative
Guidelines) when all of the following criteria are met:

1. The patient is at least 16 years of age; if the candidate is less than 16 years of age, then
treating clinician must submit information indicating why it would be clinically
inappropriate to require the candidate to meet this criterion.
2. The patient has been diagnosed with persistent, well-documented gender dysphoria as
defined by the current DSM criteria (see Appendix B) and gender identity disorder as
defined by the current ICD criteria by a qualified health professional (see Appendix A);
3. Clinical records document that the patient has made a fully informed decision and
consents to treatment or (if under age 18) assents to treatment and a parent/guardian
consents to treatment;
4. The patient's comorbid medical and mental health conditions (if present) are reasonably
well-controlled; and
5. The patient has obtained a referral letter from a qualified mental health professional (see
Appendix A).

Puberty suppression therapy is covered (subject to Limitations and Administrative Guidelines)
when all of the following criteria are met:

1. The patient has been diagnosed with persistent, well-documented gender dysphoria as
defined by the current Diagnostic and Statistical Manual of Mental Disorders (DSM)
criteria (see Appendix B) and gender identity disorder as defined by the current
International Classification of Diseases (ICD) criteria by a qualified health professional
(see Appendix A);
2. The patient has exhibited the first physical changes of puberty, indicated by a minimum
Tanner stage of 2
3. Clinical records document that the patient assents to treatment and the parent/guardian
has made a fully informed decision and consents to treatment;
4. The patient's comorbid medical and mental health conditions (if present) are reasonably
well-controlled; and
5. Puberty suppression therapy will be administered in a safe, appropriate, medically
supervised manner.

Continuous hormone replacement therapy is covered (subject to Limitations and
Administrative Guidelines) when all of the following criteria are met:

1. The patient is at least 16 years of age; if the candidate is less than 16 years of age, then
treating clinician must submit information indicating why it would be clinically
inappropriate to require the candidate to meet this criterion.
2. The patient has been diagnosed with persistent, well-documented gender dysphoria as
defined by the current DSM criteria (see Appendix B) and gender identity disorder as
defined by the current ICD criteria by a qualified health professional (see Appendix A);
3. Clinical records document that the patient has made a fully informed decision and (if at
least age 18) consents to treatment or (if under age 18) assents to treatment and a
parent/guardian consents to treatment;
4. The patient's comorbid medical and mental health conditions (if present) are reasonably
well-controlled; and
5. Continuous hormone replacement therapy will be administered in a safe, appropriate,
medically supervised manner.

Policy Title: Gender Reassignment/Gender Affirming Surgery and Treatments
Youth Services:

Based upon our criteria and assessment of the peer-reviewed literature, hormone therapy (i.e., gonadotropin-releasing hormone agents/pubertal suppressants and cross-sex hormones), with the exception of histrelin acetate (See Policy Statement XI) has been shown to be a beneficial and effective intervention for gender dysphoria, and, therefore, is considered medically appropriate (refer to Policy Guideline I).

[For mastectomy] if under the age of majority, meets all of the following criteria for early intervention:

1. has consent from both parents/guardians for surgery when applicable;
2. has identified as transgender for at least two years;
3. has been living in the desired gender role for at least one year;
4. has been receiving testosterone treatment for at least one year;
5. has received an additional letter of referral from a second qualified mental health professional or physician (refer to Policy Guidelines below);
6. has compelling reasons impacting their physical and/or psychological well-being, as documented by the patient’s mental health/adolescent medicine provider(s); and
7. has reasonably good control over any significant medical or mental health concerns that are present.
Policy Issued By: Univera Healthcare

Policy Title: Gender Reassignment/Gender Affirming Surgery and Treatments for Medicaid Managed Care Plan (MMCP) and Health and Recovery Plan (HARP) Members

Youth Services:

Bilateral mastectomy: The patient has reached the age of majority (18 years of age or older), or, if under the age of majority, meets all of the following criteria for early intervention:

1. has consent from parent(s)/guardian(s) for surgery; and
2. has identified as transgender for at least two years; and
3. has been living in the desired gender role for at least one year; and
4. has been receiving testosterone treatment for at least one year; and
5. has received an additional letter of referral from a second qualified mental health professional or physician (refer to Policy Guidelines below); and
6. has compelling reasons impacting their physical and/or psychological well-being, as documented by the patient's mental health/adolescent medicine provider(s); and
7. any significant medical or mental health concerns that are present are reasonably well controlled.

Policy Issued By: WellPoint - UniCare

Policy Title: Gender Reassignment Surgery

Youth Services:

A provider with experience treating adolescents with gender dysphoria may request further consideration of a bilateral mastectomy case in an individual under 18 years old when they meet all other bilateral mastectomy criteria above (including prior mental health evaluation) by contacting a Medical Director.

Policy Issued By: Kaiser Foundation Health Plan of Washington

Policy Title: Gender Reassignment Surgery

Youth Services:

Requirements for Mastectomy (i.e., initial mastectomy, with nipple sparing or tattooing) for female-to-male patients. Member must meet ALL of the following: A. Age 18 years or older (Note: age requirement will not be applied to mastectomy in Female-to-Male patients if the surgeon, the primary care provider, and the qualified mental health professional unanimously document the medical necessity of earlier intervention)

Requirements for breast augmentation for male-to-female members: ... Age 18 years or older (Note: age requirement will not be applied to augmentation in Male-toFemale patients if the surgeon, the primary care provider, and the qualified mental health professional unanimously document the medical necessity of earlier intervention)

Policy Issued By: WellCare

Policy Title: Gender Reassignment Surgery

Youth Services:
Gonadotropin-releasing hormone is considered medically necessary to suppress puberty in trans identified adolescents if they meet World Professional Association for Transgender Health (WPATH) criteria:

- Adolescent has demonstrated a long-lasting and intense pattern of gender non-conformity or gender dysphoria (whether suppressed or expressed); AND
- Gender dysphoria emerged or worsened with the onset of puberty; AND
- Any co-existing psychological, medical, or social problems that could interfere with treatment (e.g., that may compromise treatment adherence) have been addressed, such that the adolescent’s situation and functioning are stable enough to start treatment; AND
- Adolescent has given informed consent and, particularly when the adolescent has not reached the age of medical consent, the parents or other caretakers or guardians have consented to the treatment and are involved in supporting the adolescent throughout the treatment process.

Preferred Agents:

Leuprolide, Lupron (leuprolide), Trelstar (triptorelin), Zoladex (goserelin) Documentation of the one of following:

1. Member is less than 18 years of age; AND
   - A diagnosis of gender dysphoria/gender incongruent; AND
   - Have experienced puberty to at least Tanner stage 2; AND
   - Absence of psychiatric comorbidity that interferes with the diagnostic work-up or treatment; AND
   - Have adequate psychological and social support during treatment; AND
   - Demonstrate knowledge and understanding of the expected outcomes of GnRH analog treatment;
• OR
• Member age is 18 years or older; AND
• A diagnosis of gender dysphoria/gender incongruent; AND
• Capacity to make a well-informed decision and consent to treatment; AND
• Medical or mental issues if present are well-controlled; AND d. The regimen is a trans-feminine regimen (male to female); AND
• Failure to achieve physiologic hormone levels or an intolerance with use of oral estrogens and spironolactone

Policy Issued By: Blue Cross Blue Shield Federal Employee Program

Policy Title: GnRH Gender Dysphoria

Youth Services:

Off Label Use: GnRH analogues can be used in the treatment of Gender Dysphoria (GD) and should only be started once a diagnosis of GD or transsexualism has been made per the DSM V or ICD-10 criteria (1).

For Gender Dysphoria (GD):

MUST HAVE ALL of the following:

1. Prescribed by an endocrinologist or transgender specialist
2. Patient has met the DSM V criteria for GD

Policy Issued By: AmeriHealth

Policy Title: Gonadotropin-Releasing Hormone Agonist (Eligard®, Lupron Depot®)

Youth Services:

Leuprolide acetate for injection is considered medically necessary and, therefore, covered for puberty suppression when all of the following criteria are met:

• The adolescent has demonstrated a long-lasting and intense pattern of gender nonconformity or gender dysphoria (whether suppressed or expressed), in accordance with criteria established in the Diagnostic and Statistical Manual of Mental Disorders - Fifth Edition, [DSM-5].
• Gender dysphoria emerged or worsened with the onset of puberty.
• The individual has reached at least Tanner stage 2 of development.

Policy Issued By: Northeastern New York

Policy Title: Gonadotropin-Releasing Hormone Agonists

Youth Services:

Coverage for Lupron Depot®/Lupron Depot Ped® is provided for treatment of the following conditions:

• Gender dysphoria
• The diagnosis of gender dysphoria and the referral for hormone therapy have been made by a mental health professional in accordance with the WPATH criteria AND o The patient must be followed by an endocrinologist AND
• if used for suppression of puberty, therapy should not be started earlier than Tanner stage 2.

Policy Title: Gonadotropin Releasing Hormone Analogs

Youth Services:

Gender Dysphoria in Adolescents:

**GnRH analogs may be covered for the treatment of Gender Dysphoria when ALL of the following criteria are met:**

For *initial therapy*, submission of medical records (e.g., chart notes, laboratory values) documenting all the following:

- Diagnosis of gender dysphoria, according to the current DSM (i.e., DSM-5) criteria, by a mental health professional with expertise in child and adolescent psychiatry; and
- Medication is prescribed by or in consultation with a pediatric endocrinologist or by a physician working in a multidisciplinary clinic for transgender youth; and
- Patient has experienced puberty development to at least Tanner stage 2 (stage 2 through 4); and
- One of the following laboratory tests, based upon the laboratory reference range, confirming:
  - Pubertal levels of estradiol in females; or
  - Pubertal levels of testosterone in males; or
  - Pubertal basal level of luteinizing hormone (based on laboratory reference ranges); or
  - A pubertal luteinizing hormone response to a GnRH stimulation test; and
- A letter from the prescriber and/or formal documentation stating all of the following:
  - Patient has experienced pubertal changes that have resulted in an increase of their gender dysphoria that has significantly impaired psychological or social functioning; and
  - Coexisting psychiatric and medical comorbidities or social problems, that may interfere with the diagnostic procedures or treatment, have been addressed or removed; and
- Both of the following:
  - Current enrollment, attendance, and active participation in psychological and social support treatment program; and
  - Patient will continue enrollment, attendance and active participation in psychological and social support throughout the course of treatment; and
- Patient demonstrates knowledge and understanding of the expected outcomes of treatment and related transgender therapies; and
- Initial authorization will be for no longer than 12 months.

For *continuation therapy*, submission of medical records (e.g., chart notes, laboratory values) documenting all the following:

- Documentation of LH suppression using a GnRH stimulation test
- Documented diagnosis of gender dysphoria, according to the current DSM (i.e., DSM-5) criteria, by a mental health professional with expertise in child and adolescent psychiatry; and
- Medication is prescribed by or in consultation with a pediatric endocrinologist or by a physician working in a multidisciplinary clinic for transgender youth; and
- A letter from the prescriber and/or formal documentation stating all of the following:
  - Patient continues to meet their individual goals of therapy for gender dysphoria; and
  - Patient continues to have a strong affinity for the desired (opposite of natal) gender; and
Discontinuation of treatment and subsequent pubertal development would interfere with or impair psychological functioning and well-being; and
Coexisting psychiatric and medical comorbidities or social problems that may interfere with treatment continue to be addressed or removed; and
Both of the following:
- Current enrollment, attendance, and active participation in psychological and social support treatment program; and
- Patient will continue enrollment, attendance and active participation in psychological and social support throughout the course of treatment and
- Patient demonstrates knowledge and understanding of the expected outcomes of treatment and related transgender therapies; and
- Reauthorization will be for no longer than 12 months.

Note: Clinical evidence supporting the use of GnRH analogs for the treatment of gender dysphoria is limited and lacks long-term safety data. Statistically robust randomized controlled trials are needed to address the issue of whether the benefits outweigh the clinical risk in its use.

Policy Title: Prior Authorization/Medical Necessity – Topical Androgens

Youth Services:

No age restriction for testosterone.

Policy Issued By: Oregon Health Authority (Oregon Health Plan)

Policy Title: Prioritized List of Health Services - Gender Dysphoria/Transsexualism

Youth Services:

Hormone treatment with GnRH analogues for delaying the onset of puberty and/or continued pubertal development is included on this line for gender questioning children and adolescents. This therapy should be initiated at the first physical changes of puberty, confirmed by pubertal levels of estradiol or testosterone, but no earlier than Tanner stages 2-3. Prior to initiation of puberty suppression therapy, adolescents must fulfill eligibility and readiness criteria and must have a comprehensive mental health evaluation. Ongoing psychological care is strongly encouraged for continued puberty suppression therapy.

Cross-sex hormone therapy is included on this line for treatment of adolescents and adults with gender dysphoria who meet appropriate eligibility and readiness criteria. To qualify for cross-sex hormone therapy, the patient must:

A) have persistent, well-documented gender dysphoria
B) have the capacity to make a fully informed decision and to give consent for treatment
C) have any significant medical or mental health concerns reasonably well controlled
D) have a comprehensive mental health evaluation provided in accordance with Version 7 of the World Professional Association for Transgender Health (WPATH) Standards of Care (www.wpath.org).
